### This week-

Soybean futures see another firm week with news of China possibly adding a one-year extension of the current US trade agreement as we approach China's week-long holiday coming up next week. Conab increased their estimate of Brazil's bean crop from 176 to 178 million tons and South American weather remains favorable. However, corn market has remained relatively unchanged as we wait for the planting report at the end of March. The February WASDE had little impact on the market as it didn't move off the January numbers much. Nearby river basis continues to be firm, call us to talk bin bushels or new crop.

The markets & FGT are closed Monday 2/16 for President's Day. Feb WASDE numbers updated below.

### Last week-

Big moves on the board as soybeans jump at the prospect of Trump and China coming to any type of agreement. However, the timeline of those conversations remains uncertain. The news impacted Brazil in the opposite way this week,

dropping their cash market 20-30 cents, but their upcoming weather forecast is favorable for production. The US will also be dry so after a cold and wet start to February. This week several orders filled at \$11 flat price on new crop beans and \$4.50 on new crop corn. Feb/Mar basis river basis remains firm, call us to move your bin bushels or talk new crop. Feb WASDE releases Tuesday 2/10.

\*Let's discuss a plan for your bin bushels. Give us a call we can pick up grain at your bins.

**\*\*\*\*FGT average rebate over 56 years is .121 per bushel.**

Crop Planting Progress/Conditions report that comes out every Monday afternoon.
