This week-

March USDA WASDE report released Tuesday, 3/10, updated numbers below. Overall, report was neutral. However, headlines not so neutral with fuel prices and potential logistics issues key factors at the moment. Crude oil trading 95.08 as I type this... down off Mondays high of 119.85 but up from 82.10 yesterday. Diesel up over a dollar week on week and not following crude down as quickly as it did up. Market support seems fragile as it's a fundamental game, but the volume and money are there. Similar headline themes as last week... Middle Eastern Conflict, China/US trade talks, Brazilian Harvest, and US planting progress. Old crop and new crop futures trending up on both corn and beans. Call us to talk bin bushels or new crop today.

Last week-

Big week in the headlines as the Middle East conflict is disrupting crude oil and fertilizer supply as the US begins planting. The southern farmer is rolling with decent to good plant conditions so far. Some rain likely this weekend. Corn export sales firmer than expected causing a 9c jump on May '26 futures. Soybean complex still waiting on what the White house will do on potential meeting with China and the EPA proposal. Soybean oil also linking closely to crude oil. USDA WASDE report out next Tuesday, March 10. Call us to talk old crop, bin bushels, or new crop.

*Let's discuss a plan for your bin bushels. Give us a call we can pick up grain at your bins.

******FGT average rebate over 56 years is .121 per bushel.**

Crop Planting Progress/Conditions report that comes out every Monday afternoon.
