This week-

All FGT locations and markets are closed today, June 19th, in observance of Juneteenth. We saw a small jump this week on corn and beans with rumors that China started buying US beans again. The rumor they bought anything has since been debunked, however, they could still be shopping offers. The 60-day ceasefire with Iran has been signed and should allow traffic to start moving through the strait. That traffic should have a positive impact on fuel and fertilizer for the consumer. The weather is calling for rain across the central US due to the tropical storm. Should span all the way from the South to the Eastern Corn Belt. Wheat harvest has pretty much wrapped up here, if you have any left to haul in please let us know. Also, as always, let us know if you'd like to discuss new crop. Have a safe & happy Father's Day!

Last week-

June WASDE was released today at 11 am. Another report that didn't move the needle much as market was practically unchanged. All updated numbers below. Middle eastern conflict continues as the US is navigating whether or not to strike. Crude oil and soybean oil are slightly firmer but not responding to the headlines the way they were at the beginning. Crush margins remain strong as we reach the end of the crop year and they will be working to ensure supply. Overall crop quality in the ArkLaMiss looks good, some questionable spots for corn down into the I-20 corridor and south but beans seem to be coming along nicely. Another couple rains would do us well. Wheat harvest has wrapped up some if you have any left to sell or haul in please let us know. Same with any new crop or old crop bushels. Thank you!

*Let's discuss a plan for your bin bushels. Give us a call we can pick up grain at your bins.

******FGT average rebate over 56 years is .121 per bushel.**
